However, there are also reports that diabetes plays a role in the pathogenesis of established glaucoma. According to the hypothesis of some authors, diabetes may cause glaucomatous optic nerve damage by several mechanisms: altering blood flow, impairing blood-retinal barrier function or elevated intraocular pressure (IOP). Moreover, the coexistence of both diseases is regarded as a risk factor for the development of glaucoma in patients with diabetes. This paper reviews the current literature on the prevalence, pathogenesis and management of glaucoma in patients with diabetes.

I created this but it doesnt work. I put in the Textwrangler and it didnt work. Can anyone help me to solve this? A: You can do that simply by function, no need for mbstring: `function checarNumero($num){ $str = strtoupper($num); return $str; }` And if you want to convert all the string to lowercase: `function checarNumero($num){ $str = strtolower($num); return $str; }` A: You can use `strtolower` in php.
