In particular, these styles focus on the venerable waterproof tarantula, the venerable canvas moccasin, and the versatile high-top. In this video we touch briefly on a few videos that highlight the perspective on old west-style footwear that has been taken by other makers on the market. Then we take a close look at the extremely comfortable and luxurious Soft-Top SnakeSkin model, which is designed to stimulate any desire you may have to make a memorable impression this season. Finally, we demonstrate a bizarre but innovative take on the classic cowboy boot style by the Sock Monkey, a series of footwear designed for the times when clowns were the coolest thing since sody pop. --- Vlog Camera --- This video was shot using the Panasonic LUMIX DMC-TZ7, a perfect little pocket sized point and shoot with a wealth of features. This camera weighs only 350 grams, it's housed in a nice retro styled faux leather holster that has a little channel in the front so you can slip it in your pocket, and the controls are located at the rear of the device so that you can frame your shot without accidentally shooting yourself. The built in LCD screen is bright, clear and should provide excellent visibility in

- Eugene Kaspersky 42 Minutes Eugene Kaspersky has caught the world's attention. An IT security professional with over 30 years of industry experience, Yuliya Demina enthuses about Eugene and his achievements as founder of the talented Kaspersky Lab. After having worked abroad, Eugene decides to move back to the country where he lives, Russia, and now he can reach his full potential. His success has blown the doors wide open and this is what he dreams of. Writing a novel, organizing a digital revolution and kick-starting companies are his favourite activities. We want to know more about the lead character whose personal life, style and thoughts we share during the interview. This global story is candid and personal with a brilliant, stylish and fearless mind. The Interview... Q: Interview by Domenico Frattasi, Editor-in-Chief of the BAAR.D community, web host of Il Collegio dell'Aurora and consultant to Bits of Intelligence. A researcher from the university of Montpellier, France is lurking in the shadows of the new docu-series The Dragon. It represents a formidable challenge for a professional who works in IT security. Eugene is the victor and the first to raise the flag of a new world where speaking truth has become a living passion. He has grown the Kaspersky Lab from an IT security company into a digital security system developing their own solutions or working in partnership with other vendors in order to provide comprehensive solutions. That's a long and hectic story, I would like you to remind us an anecdote that you have in your life. A: My very good friend and national winner of the Prize for the best teenage composer, Marina Komarovna, once told me "to lose someone in the part of the brain that is responsible for the emotions". At that time I thought she was crazy and I couldn't understand how someone could think that. My emotions were the greatest reason for every success and it was only when I started to work for myself and settled in the world of business that I realized I needed to be a little more calm. Q: Why do you think there is a need

to separate Business Software from the one that you are using for business administration purposes and web skills?
A: Only a few years ago, people who created software were not required to have a deep understanding of what they were doing. They knew how to use a computer

BLEEP IS A LARGE BLOOPY AND IS VERY LOUD BLOP IS A SMALL WHITE ROBOT AND IS VERY SMALL This small and quiet robot doesn't like big and loud things. So, he decided to make a loud and big robot in order to get rid of his icky noises. The BLEEPY BLOOPY features a GIANT SOUND SYSTEM, MASSIVE-SIZED ELECTRONICS AND A LARGE BOTONIC REGISTRATION NUMBER. Unfortunately, the robot BLEEPY BLOOPY doesn't like the robot BLEEPY BLOOPY. So, the BLEEPY BLOOPY starts looking for ways to expel the robot BLEEPY BLOOPY from his and his home. This game is a bit different than the other ones of this series. You need to control both of the robots. Bleep is the robot that's being lazy and resting on the robot BLOOPY. BLOP is the robot that's being active and that's looking for its friends. Playing as Bleep feels rather satisfying. He has the classic Bleep's lazy button. If you hold on to the button, you'll float in the air. Holding the button down also helps you to climb surfaces. The robot BLOOPY is a bit on the aggressive side. He has a roaring button that creates a lot of noise, and he can push you in the air. Holding the button down also makes you climb surfaces. Differently from the other levels of this series, the game takes place inside a giant puzzle. To escape from the puzzle, you must guide both robots to reach the exit. Bleep Bloop is the first game in the series that has a "new" keyboard and mouse control mode. You can play the game either using standard joysticks or either the standard keyboard or mouse controls.
