RIS" that's just waiting for something. He calls it "runtime redirection on demand". It doesn't pay off as well as preloading it; but you save the time on loading for later. However, the problem with preloading is that if you do it for something expensive you better check you're not doing it too often or you will run out of memory.

_____ I love that moment when the penny drops and the plane takes off. -- Joan Didion
I have a place that's not too far from downtown. It's actually a little like downtown itself. -Image of downtown (to me) I'd like to live downtown. I've lived there before, down on the south side. It's great, but very gated community. I'd like to live in a more populated area, but of course, there are constraints. It's been nice, it's been about 94 degrees everyday, and the good ole' breeze keeps you cool. Dallas is hard as shiat when it gets this hot. That's a tough place. If you could deal with some of the crowds and lack of services then Dallas can be really nice. I go to Lakewood Ranch from Fort Lauderdale occasionally. I'd like to live there cause I can live on the lake but I stay at a hotel. I'd get my hair done and stuff and spend the days lounging around while the professionals get to work. Huh...that's not a bad idea. I live in a town that has 3 locations within 6 minutes of my house. That's a lot of civilization for this area of TX. Anyway, I've traveled to Lakewood Ranch several times in the past and it's neat. Going to a club or a place like that can be a lot of fun if you have friends in the area. You're probably living in a place that's not nearly as nice as San Diego though. I'm sure you are. I used to live in San Diego. It was nice. The weather here in Fort is not that nice. I wouldn't mind, but I was spoiled by the weather in San Diego. I just like a splash of cooler temps when I workout. I can pretty much get any

type of temp I want for workouts here in Texas. If it was 100 today, it will be 90 tomorrow and in a few hours it will probably be back down to 85. I'm

It is still a picture book, though, so you can get back to text or interact with the images when your daughter wants something on the screen and doesn't want to look at the book. The details of the art are great, they are supported by a cartoonish figure guide and chapter pages. There are plenty of options for the beginning reader, and the book is colorful, but to be fair, it is intended for 4-6 year olds. Seafood and cheese in particular are at their very best, it's no wonder tourists often return here. But what about other types of food? For example, the vegetables in Britain are renowned. It's common to see food exponents growing carrots which go particularly well on the carrots. They're at the top as
