game i want to download m.The present
invention is directed to the art of drilling
and completing wells. More particularly,
the present invention is directed to an
improved system for setting packers within
a well bore, and methods of using same,
wherein the present system includes a
plurality of setting tools in a single sub.
More specifically, the present system
includes an improved setting tool that
includes a more reliable and less
complicated structure and a more reliable
and less complicated actuating
mechanism. A technique for setting a
wireline retrievable packer is set forth in

U.S. Pat. No. 4,512,605, the entire disclosure of which is incorporated herein by reference. That technique uses a drop bar type mechanism that includes a cable that is pulled downwardly on the drill string, such that the packer is set as the sub is being pulled from the drill string. A setting tool that utilizes the technique is called a micro-drop setting tool. In those instances where the sub containing the setting tool is run to a depth above the location of the packer, a temporary isolation plug is forced into the setting tool, and the setting tool is run downwardly to set the packer. When the packer is set, the temporary isolation plug is pulled from the setting tool, and the drill string is re-run with the sub having the isolation plug and the setting tool removed. The drill string is

then pulled, and the new string is inserted into the sub such that the new string is positioned below the packer. The sub with the new string is then run to the desired depth, and the sub is again pulled out, leaving the new string in the well. At this time, an isolator is pulled from the new string, and a conventional wireline retrievable packer is set. The drill string is then run into the well. The drill string is again pulled out, but the micro-drop setting tool is run back into the well. The temporary isolation plug is dropped into the setting tool, and the setting tool is run into the well such that the packer is again set. With this technique, the drill string is pulled twice to set the packer. That is not necessary, and it provides a time consuming and complicated procedure.

The present invention is directed to a system for setting a packer in a well using a single trip of
